

JOIN OUR TEAM!

Area Councils help to steer the union politically, organizing a response to federal and local governments and to employers when their policies and regulations are not in our members' interests. They may organize and lobby their political representatives, devise campaigns to educate and raise awareness of issues affecting our members, workers and the Canadian public.

Area Council members also work with community partners, build links with other Labour groups and send members to PSAC Regional and National Conventions.

For further information regarding the mandate, objectives, membership & composition of the Area Council, please refer to the attached bylaws also available for download at
